

V-Flow GRP Dry Bonding Gutter High & Low Profile

A GRP Dry Bonding Gutter is a mortarless system which creates a weather tight joint between dissimilar roof coverings on adjacent roofs, and joins any combination of slates or flat and profiled tiles.

The Dry Bonding Gutter is supplied in 3mt lengths, in **70mm (Low)** and **100mm (High)** profiles, depending on the roof covering being used. They are finished in a standard lead grey colour, and are BBA Letting air through. Keeping moisture out!

The Dry Bonding Gutter creates a close-cut appearance on refurbished properties where fixing times can be cut by up to 50% over traditional mortar methods.

Packs should be stored flat or on end on a smooth, clean dry surface; under cover and protected from sunlight.

70mm Dry Bonding Gutter

100mm Dry Bonding Gutter

SIZE	3000mm long x 225mm wide
MATERIAL	UV Glass fibre/Polyester laminate.
PACK SIZE	10 per pack .
